Gemini CLI: your open-source AI agent Free and open source, Gemini CLI brings Gemini directly into developers terminals with unmatched access for individuals. Taylor Mullen Senior Staff Software Engineer Ryan J. Salva Senior Director, Product Management Read AI-generated summary Gemini CLI is here to boost your developer experience. This open-source AI agent brings Gemini directly into your terminal for coding, problem-solving, and task management. You can access Gemini 2.5 Pro for free with a personal Google account, or use a Google AI Studio or Vertex AI key for more access. Summaries were generated by Google AI. Generative AI is experimental. "Gemini CLI: your open-source AI agent" introduces a new tool bringing AI power to your command line.Gemini CLI gives you direct access to Gemini for coding, content creation, problem-solving, and more.You get unmatched free usage limits with a personal Google account, accessing Gemini 2.5 Pro.Gemini CLI is open source, so you can inspect the code and contribute to its development.Gemini CLI shares tech with Gemini Code Assist, offering AI help in both your terminal and VS Code. Summaries were generated by Google AI. Generative AI is experimental. Gemini CLI Upgrade your terminal experience with Gemini CLI today. Try it now For developers, the command line interface (CLI) isn't just a tool; it's home. The terminals efficiency, ubiquity and portability make it the go-to utility for getting work done. And as developers' reliance on the terminal endures, so does the demand for integrated AI assistance.Thats why were introducing Gemini CLI, an open-source AI agent that brings the power of Gemini directly into your terminal. It provides lightweight access to Gemini, giving you the most direct path from your prompt to our model. While it excels at coding, we built Gemini CLI to do so much more. Its a versatile, local utility you can use for a wide range of tasks, from content generation and problem solving to deep research and task management.Weve also integrated Gemini CLI with Googles AI coding assistant, Gemini Code Assist, so that all developers on free, Standard, and Enterprise Code Assist plans get prompt-driven, AI-first coding in both VS Code and Gemini CLI. To use Gemini CLI free-of-charge, simply login with a personal Google account to get a free Gemini Code Assist license. That free license gets you access to Gemini 2.5 Pro and its massive 1 million token context window. To ensure you rarely, if ever, hit a limit during this preview, we offer the industrys largest allowance: 60 model requests per minute and 1,000 requests per day at no charge.If youre a professional developer who needs to run multiple agents simultaneously, or if you prefer to use specific models, you can use a Google AI Studio or Vertex AI key for usage-based billing or get a Gemini Code Assist Standard or Enterprise license. Gemini CLI offers the industrys largest usage allowance at 60 model requests per minute and 1,000 model requests per day at no charge Now in preview, Gemini CLI provides powerful AI capabilities, from code understanding and file manipulation to command execution and dynamic troubleshooting. It offers a fundamental upgrade to your command line experience, enabling you to write code, debug issues and streamline your workflow with natural language.Its power comes from built-in tools allowing you to:Ground prompts with Google Search so you can fetch web pages and provide real-time, external context to the modelExtend Gemini CLIs capabilities through built-in support for the Model Context Protocol (MCP) or bundled extensionsCustomize prompts and instructions to tailor Gemini for your specific needs and workflowsAutomate tasks and integrate with existing workflows by invoking Gemini CLI non-interactively within your scripts Gemini CLI can be used for a wide variety of tasks, including making a short video showing the story of a ginger cats adventures around Australia with Veo and Imagen Because Gemini CLI is fully open source (Apache 2.0), developers can inspect the code to understand how it works and verify its security implications. We fully expect (and welcome!) a global community of developers to contribute to this project by reporting bugs, suggesting features, continuously improving security practices and submitting code improvements. Post your issues or submit your ideas in our GitHub repo.We also built Gemini CLI to be extensible,building on emerging standards like MCP, system prompts (via GEMINI.md) and settings for both personal and team configuration. We know the terminal is a personal space, and everyone deserves the autonomy to make theirs unique.Shared technology with Gemini Code AssistSometimes, an IDE is the right tool for the job. When that time comes, you want all the capabilities of a powerful AI agent by your side to iterate, learn and overcome issues quickly.Gemini Code Assist, Googles AI coding assistant for students, hobbyists and professional developers, now shares the same technology with Gemini CLI. In VS Code, you can place any prompt into the chat window using agent mode, and Code Assist will relentlessly work on your behalf to write tests, fix errors, build out features or even migrate your code. Based on your prompt, Code Assists agent will build a multi-step plan, auto-recover from failed implementation paths and recommend solutions you may not have even imagined. Gemini Code Assists chat agent is a multi-step, collaborative, reasoning agent that expands the capabilities of simple-command response interactions Gemini Code Assist agent mode is available at no additional cost for all plans (free, Standard and Enterprise) through the Insiders channel. If you arent already using Gemini Code Assist, give it a try. Its free tier has the highest usage limit in the market today, and only takes less than a minute to get started. So what are you waiting for? Upgrade your terminal experience with Gemini CLI today. Get started by installing Gemini CLI. All you need is an email address to get Gemini practically unlimited in your terminal. Gemini CLI Upgrade your terminal experience with Gemini CLI today. Try it now POSTED IN: Developers AI Gemini Models Gemini Features Youre never more than a tap away from your data and settings. Just tap your profile picture and follow the link to Manage your Google Account. From your profile picture, you can also easily sign in, sign out, or turn on Incognito mode. When it comes to privacy, we know one size doesnt fit all. Thats why every Google Account comes with easy-to-use controls and tools like Privacy Checkup so you can choose the privacy settings that are right for you. You can also control what data is saved in your account with easy on/off controls, and even delete your data by date, product, and topic. Your Google Account gives you a safe, central place to store your personal information like credit cards, passwords, and contacts so its always available for you across the internet when you need it.
