Conjunction words with tamil meaning

The article discusses the importance of conjunctions in language, highlighting that they are rare but not unique. The author notes that conjunctions are often overlooked and underappreciated, unlike articles which receive more attention. They also raise the question of why there were no special envoys (emissaries) to Israel on other occasions. Additionally, the text includes a list of English words with their Tamil translations, covering various conjunctions such as "and", "but", "or", and others. These words are often used to connect ideas or show relationships between things, but they may not always be necessary in every sentence. Overall, the article emphasizes the significance of conjunctions in language and encourages readers to learn and appreciate their importance. Using something in conjunction with other parts or components can have risks (14.9). However, when done correctly, it can also activate our inspiration and creativity (9). For example, you might use Idana with a paper patient file (10) or work with male-female standoffs (11), but not with the Fly Fishing Package (12). In other cases, like using lavender oil within three months (13), the conjunction can be beneficial. On a deeper level, there is an evident connection between heaven and the Lord (14). This connection can also have a profound impact on our lives, as seen in the planetary conjunction of May which is already affecting us (15). Finally, certain words or tags, such as [blade-runner-series], should be used in conjunction with specific criteria (16), just like the comet C/1998 T1 was in conjunction with the Sun in 1999. A conjunction is a grammatical term used to join two phrases, clauses or sentences together. In Tamil, the word for conjunction is "Conjunction" (Conjunction). Conjunctions are classified into four types: coordinating conjunctions, subordinating conjunctions, conjunctive adverbs and correlative conjunctions. Coordinating conjunctions connect words or phrases that have the same grammatical value. Examples of coordinating conjunctions include "and", "but", "for", "so" and "or". For example: "Nagesh went to school on Monday morning; however, he was not late regularly." Subordinating conjunctions introduce a dependent clause in a sentence. They indicate the relationship between two clauses. Examples of subordinating conjunctions include "as", "if", "after", "before" and "although". For example: "He played football after going to the bathroom." Conjunctive adverbs are used with coordinating conjunctions to connect two independent clauses in a sentence. They indicate the relationship between the two clauses. Examples of conjunctive adverbs include "also", "finally", "next" and "otherwise". For example: "Ramesh went to school on Monday morning; however, he was not late regularly." Correlative conjunctions are used to connect words or phrases that have a similar meaning. They indicate the relationship between two clauses. Examples of correlative conjunctions include "both - and", "either - or" and "neither - nor". For example: "Both the captain and the team member ran five kilometers every day." Common conjunction words in Tamil include: * And (ஊடுதல்) - Actually (உண்மையில்) * After (பின்னர்) - Also (மேலும்) * Another (மீண்டும்) - As (போல) * Because (காரணம்) - Before (முன்பாக) * Beside (பக்கத்தில்) - Equally (சமமாக) * For (ஏனெனில்) - Also (மேலும்) Firstly, it's important to understand that in Tamil, there are different types of conjunctions that connect words or phrases together. There are four main categories: conjunctions of reason, purpose, place, and time. The most common type is the conjunction "and" (ஊடுதல்), which connects two or more equal things together. For example, if you want to say "I like reading books and watching movies," you would use "and" to connect the two actions. This conjunction helps to link ideas or phrases together in a logical and coherent way. The text provides several examples of how "and" is used in different sentences, such as: * We buy sweets and chocolates from the grocery store. * We planned to visit cities and villages. * The sofa is soft and comfortable. * I like fishing and eating. * My hobbies are skiing and scuba diving. In each case, the conjunction "and" helps to connect two or more equal things together, creating a clear and logical sentence. The Tamil word "or" (ஊடுதல்) can be translated to English as "or". However, it is not limited to just providing two options like the English word "or". It has multiple meanings and functions depending on the context. In general, "or" in Tamil can mean "and", "but", or "either... or". For example: * சுவைகள் அல்லது சாண்ட்ஸ் (sweets or snacks) - meaning either one of the two options * நான் காணவில்லை அல்லது கேள்விப்படவில்லை (I did not see or hear anything differently) - meaning neither one nor the other * ஊடுதல் (ஊடுதல்) (He has no interest in singing or dancing) - meaning both options are excluded In some cases, "or" can also imply a choice between two alternatives. For example: * ஊடுதல் ஊடுதல் (Which one is easier to travel by train or by plane?) - implying a choice between the two options * ஊடுதல் ஊடுதல் (You could call him smart or great) - implying a positive evaluation of the person * ஊடுதல் ஊடுதல் (It is your time. Will you go to take a bath or stay in bed?) - implying a choice between two alternatives Overall, the Tamil word "or" has multiple meanings and functions depending on the context, and can be used to provide options, imply choices, or exclude certain possibilities. **Coordinating Conjunctions** * "I missed the train" and "another phrase" are connected by the conjunction "but". * Correlative conjunctions, such as "either...or", "neither...nor", "both...and", connect two phrases that have equal importance. * Examples: "He visited not only Agra but also Delhi", "It is neither gold nor silver". **Compound Conjunctions** * Compound conjunctions, such as "in order that", "even if", "so that", are used to join two clauses of different ranks. * Examples: "The notice was published in order that all might know the facts", "Even if it rains, we will go ahead with the plan". **Subordinating Conjunctions** * Subordinating conjunctions, such as "when", "because", "if", connect a dependent clause to an independent clause. * Examples: "When he was crossing the road, he met with an accident". * Important subordinating conjunctions include "after", "as", "before", "though", and "unless". **Tenses** * The chapter also covers tenses, including simple future, past, present, and various degrees of comparison. * Interjections and future tense are also discussed. Note: The original text appears to be a passage on grammar in Tamil, with English translations provided. I've paraphrased the main points for clarity.
